Estimated electricity output

Daily average

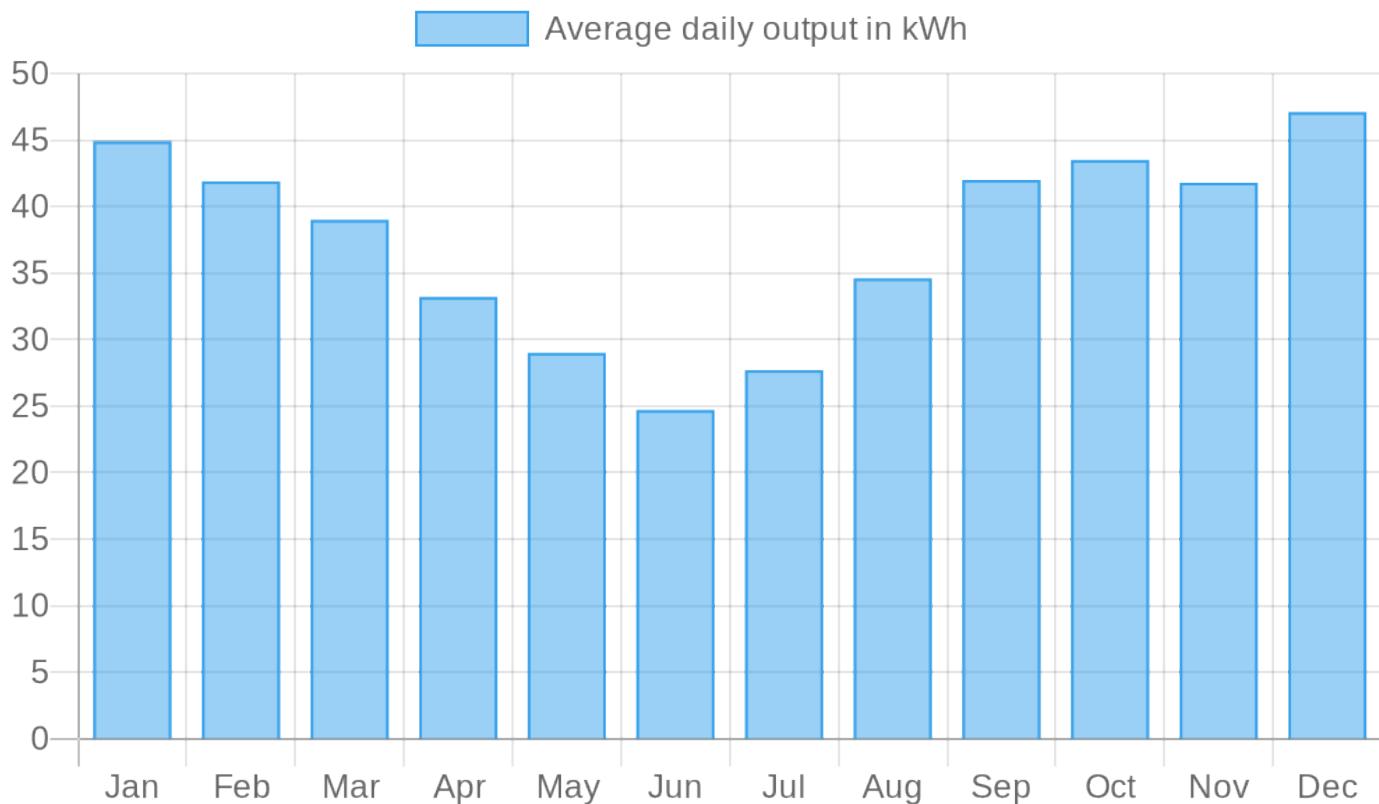

37.5kWh

Yearly average

13660.2 kWh

Daily average per month (kWh)

44.9	41.9	39	33.2	29	24.7	27.7	34.6	42	43.5	41.8	47.1
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Estimated solar and weather data: Coffs Harbour NSW

Estimated output is calculated based on <https://pvwatts.nrel.gov/> data. Solar and weather data is from **PVWatts** and is used from the nearest capital city to the installation site. Shading percentages are an estimate only. Panel/roof pitches are assumed to be 21 degrees except when stated otherwise. Panel/roof orientations are approximate to within 22.5 degrees. Outputs are an estimate only based on mathematical models. Actual production may vary.

Pay As You Save

Your Current Bill

WEEKLY	QUARTERLY	1 YEAR	5 YEARS (+10%)	10 YEARS (+10%)	25 YEARS (+10%)
\$154	\$2,000	\$8,000	\$51,651	\$136,632	\$884,998

Figures are based off your current quarterly electricity bill, taking into account annual rises in the cost of electricity.

Need more smart reasons to switch?

Protection against increasing energy costs

When electricity costs rise, your Smart Energy solar system ensures you don't feel it.

Increase in property value

Homes equipped with solar energy systems have a higher property value – if one day want to sell your home, you'll do it faster thanks to your solar system.

Reduce or even eliminate electricity bills

Doesn't matter how much solar energy you consume, you'll save money by saving on bills.

Return on your investment

Your annual returns could be anywhere between 10 and 30 percent.

support@smartenergygroup.com.au

I/We hereby assign my/our right to create Small Scale Technology Certificates (STCs) to Smart Energy Group PTY.LTD. in Lieu of an upfront cash discount as specified on this agreement. /We hereby authorise Smart Energy Group PTY.LTD. to deduct the amount shown from my nominated credit card (if specified). The customer has a cooling off period of ten (10) business days in which the customer may cancel this agreement. Although we may assist in arranging for the goods to be connected to the main grid and for the installation of the meter at the premise, the agreement to undertake that connection and installation is an agreement between the customer and his/her electricity retailer/ distributor company. The costs and risks of that connection and installation are not included in this agreement. Older meter board and switchboard s may not meet current safety standards, and it may be necessary to upgrade your board. The upgrade fees will be charged to homeowner. *This is the total price of the solar system before any incentives. **This is the total price of the STC value calculated at the time of the sale. ***This is the total out of pocket price and after the Government rebate
